

Peter Rowe

About Myself

As a motivated developer, I am the sort of person to jump headfirst into a project and challenge myself to overcome new obstacles. Learning to play, and playing to learn, I love making games to explore different concepts and share stories through the language of gameplay. Being a team player, you will always hear me asking technical questions about everyone's work whether it relates to my field or otherwise. I reflect on my team in my code, by building robust tools and documentation while developing shippable products. Many look up to the standard I set, while finding my youthful energy infectious.

Skills and Talents

Programming
3D Modelling
Backend Development
Team Management
Project Leader
Game designer
Website Development

Languages and Tools

C++ C# C
Python Linux
Lua GDScript
HTML CSS
Unity Godot
Blender Gimp
Ubuntu VIM
Github Trello
